MINI PROJECT – GENERATIVE AI by IBM

Project Title: AI Personal Study Assistant

Your task is to create 3 things:

1. A PDF containing study materials.
2. A website for your study assistant.
3. A chatbot that answers questions using your PDF.

Tools to use: ChatGPT, Canva or MS Word, Chatbase, and a website builder.

STEP 1: Create Your Own Study Material PDF

1. Open ChatGPT.
2. Type the prompt for AI personal Study assistant document.
3. Open MS Word, Google Docs, or Canva.
4. Paste the content and arrange it neatly.
5. Add a title page with your name, department, and project title.
6. Save or download the document as a PDF.
7. Make sure your PDF contains at least 5–8 pages.

You can choose any subject, such as Python, Artificial Intelligence, Machine Learning, Cybersecurity, or Data Science.

STEP 2: Create Your Chatbot Using Chatbase

1. Open the Chatbase website: https://www.chatbase.co/
2. Create an account or log in.
3. Create a new chatbot.
4. Find the option to add a knowledge source or upload a document.
5. Upload the PDF you created in Step 1.
6. Wait until the document is processed.
7. Set the chatbot instructions using this prompt:

   "You are my personal study assistant. Answer questions using the uploaded PDF. Explain concepts in simple English. If the answer is not available in the PDF, tell the user that the information is not available in the uploaded study material."

8. Save your chatbot settings.
9. Open the chat window and ask questions from your PDF.
10. Deploy our chatbot ,copy prompt and take screenshot.

STEP 3: Create Your Website

1. Open ChatGPT.
2. Type prompt for AI Personal Study Assistant website creation
3. Open a website builder emergent .ai .
4. Create a new website project.
5. Paste your prompt .
6. Allow it to generate the website.
7. Check whether all sections are displayed properly.
8. Deploy your Chatbase chatbot using its supported embed code or integration option.
9. Preview and publish the website and copy the link.Take screenshot.

Important: If you use a no-code website builder, you can give it the prompt directly. You do not need to write code yourself.

STEP 4: Test Your Chatbot

Open your chatbot and ask these 10 questions:

1. What is the main topic of my PDF?
2. Explain the first topic in simple words.
3. Give me a short summary of the PDF.
4. List five important points.
5. Give me five multiple-choice questions.
6. Explain one concept with an example.
7. Prepare short revision notes.
8. Compare two topics from my PDF.
9. Ask a question whose answer is not in my PDF.
10. Ask an unrelated question and observe the answer.

Check whether the chatbot gives correct answers by comparing them with your PDF.

STEP 5: What Should You Submit?

Every student must submit:

☐ Your own study material PDF (5–8 pages).

☐ Your published website link,

☐ Your Chatbase chatbot link,

☐ Screenshots of your website.

☐ Screenshots showing your chatbot answering questions.

☐ A document containing all 10 test questions and the chatbot's answers.

☐ A short conclusion explaining what you learned.

6. Evaluation Criteria

Assessment Component	Marks
Original PDF content and presentation	20
Website design and usability	20
RAG chatbot implementation	20
Testing and answer verification	20
Documentation and demonstration	20
Total	**100**

Final Instructions

- Complete this mini project individually.
- Create your own PDF using ChatGPT.
- Upload the same PDF to Chatbase.
- Connect your chatbot to your website.
- Test the chatbot before submitting.
- Make sure your website and chatbot work properly.
- Be ready to demonstrate your project and explain how it works.

Your final output should be: One study PDF + One website + One working RAG chatbot.
